### Something about me:

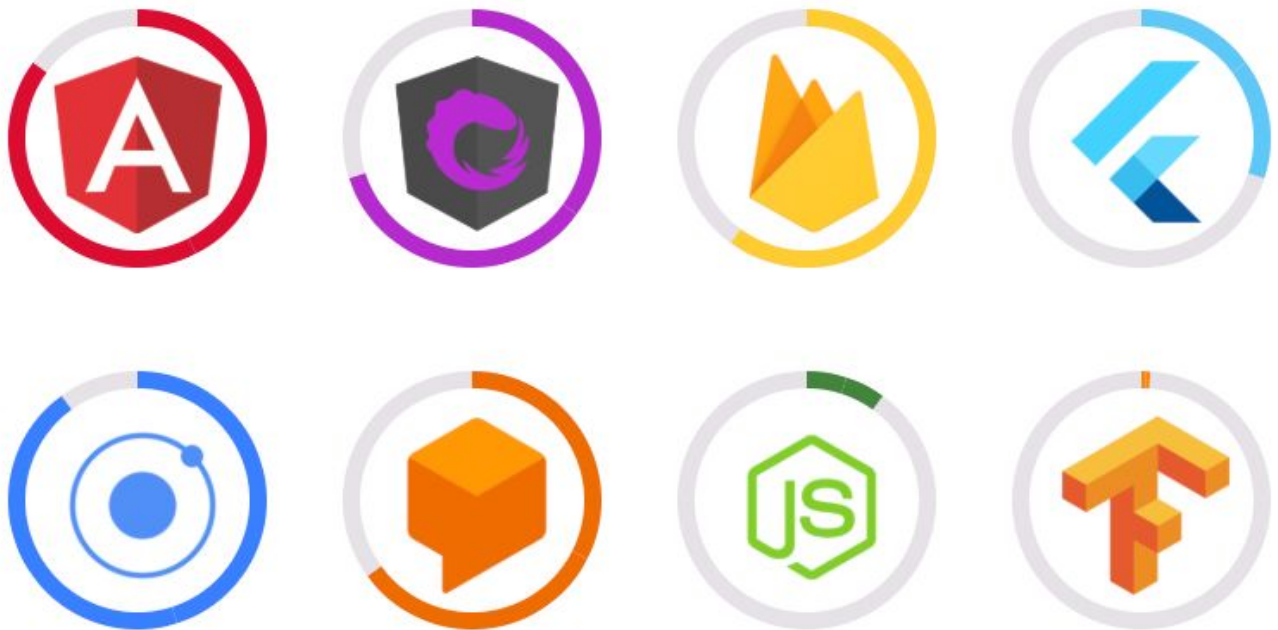

I am characterized by being self-taught and disciplined with the objectives that I propose, passionate with the world of software and its endless possibilities.

I am a man dedicated to his family who enjoys sports, healthy life and nature. When I am not in front of a computer I find myself enjoying the company of my wife and my 7 beautiful dogs.

I consider myself a creative person who always focuses on finding practical solutions to different problems. In addition, I consider that one of my best qualities is perseverance in the face of adversity.
